KEY SKILLS TRAINING FOR STUDENTS

Student Hubs delivers key skills sessions to students. Topics include teamwork, leadership, public speaking, problem solving and project management.

Benefitting from 10 years’ experience of supporting students to start and lead socially impactful projects, Student Hubs also provides training sessions focused on skills for social impact.

After our sessions, students are more confident in approaching challenges; better able to lead and work with others to achieve goals; and report an improved experience at university.

Student Hubs' training is delivered in partnership with Careers Services, Students’ Unions, Volunteering Centres and specific university departments. Working together, we enhance the student experience and provide students with opportunities to develop key employability skills. We work closely with university partners to ensure that sessions are relevant and fit with students’ personal and professional development. Sessions typically last 90 minutes to two hours or can be combined to make half or full day workshops with the option of parallel sessions. Prices start at £250.

“Our innovative, interactive and enjoyable training sessions have been essential to the success of the leadership programme. Working with Student Hubs has enabled us to offer a wide range of skills sessions to students who have given us positive feedback about how much they take from the sessions into future employment and careers.”
- Samuel Murphy, Birmingham Business School

Our sessions are designed to encourage students to learn from each other, share ideas and develop skills that complement their academic learning.

Student Hubs is a charity working across UK universities. We believe students have the power and potential to shape a better world. Putting social action at the heart of the student experience, Student Hubs supports university students to take leadership roles in tackling social and environmental challenges in their local communities.
